

RENAD EID BORHAM

Computer Science Student | AI/ML | Generative AI | LLMs | Agentic AI
Tanta, Gharbia, Egypt | renadborham@gmail.com | 01013167209 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science student (expected 2027) building practical AI systems across machine learning, Generative AI, RAG, LLMs, Agentic AI, backend APIs, and MLOps. Hands-on projects include an AI job-matching/application platform, autonomous coding agent, distributed database system, and production-oriented ML pipeline.

TECHNICAL SKILLS

Programming: Python, C++, JavaScript, HTML/CSS

AI/ML: Machine Learning, Deep Learning, NLP, LLMs, Generative AI, RAG, Agentic AI; Pandas, NumPy, scikit-learn, TensorFlow, PyTorch

GenAI & Backend: LangChain, LangGraph, Ollama, FastAPI, Node.js, React, REST APIs, Playwright

Data & Tools: MongoDB, SQL, Docker, Git/GitHub; Object-Oriented Programming, Data Structures, Algorithms, Problem Solving

EDUCATION

Egyptian Chinese University (ECU) | Bachelor of Computer Science Expected 2027

EXPERIENCE & TRAINING

Agentic AI Intern | Orange 2026

- Built an end-to-end Agentic AI application combining single-agent and multi-agent workflows, RAG, LLMs, API/tool integrations, LangChain, and LangGraph.
- Applied agent orchestration through practical exercises and a final project, translating core concepts into a working multi-step AI system.

LLM & Generative AI Training | Information Technology Institute (ITI) 2026

Machine Learning Trainee | Digital Egypt Pioneers Initiative (DEPI) 2026

Applied AI for NLP & Cybersecurity - Summer Training | Electronics Research Institute (ERI) 2026

Advanced AI Bootcamp | Egyptian Chinese University (ECU) 2026

Application Software Development Training | Innovera Academy 2026

SELECTED PROJECTS

JobFlow - AI Job Matching & Application Automation Platform | Team Project

FastAPI, React, LangChain, LangGraph, Ollama, Playwright, LLMs, RAG

- Co-developed a local-first platform that combines job discovery, student-aware semantic ranking, ATS CV generation, and reviewed application automation in one workflow.
- Implemented CV parsing, semantic matching/ranking, LLM and agent workflows, job discovery, ATS CV generation, auto-fill, testing, and end-to-end FastAPI/React integration.
- Added human-in-the-loop safeguards: applications require explicit confirmation and the system flags missing factual answers, login requirements, and CAPTCHA instead of inventing candidate data.

Autonomous Coding Agent | Individual Project

Python, Ollama, Agentic AI, LLMs

- Built an agent that reads, creates, edits, backs up, and executes code, detects runtime failures, automatically proposes fixes, and re-runs after changes.
- Enabled execution across 3 languages - Python, JavaScript, and C++ - with project memory, logging, workspace isolation, and restricted command execution.

Distributed Database E-Commerce System | Team Project

FastAPI, MongoDB, Docker, HTML/CSS/JavaScript, REST APIs

- Implemented FastAPI services, frontend integration, testing, and documentation for product, cart, order, and cluster-status workflows.
- Demonstrated distributed behavior using 2 logical MongoDB shards plus a real 3-node replica set supporting replication, failover, and recovery.

Production-Oriented ML Pipeline | Team Project

Python, Machine Learning, MLOps

- Contributed across preprocessing, model training/evaluation, inference, experiment tracking, workflow orchestration, testing, documentation, and system integration.

ADDITIONAL PROJECTS & COURSES

Projects: Breast Cancer Classification, CTR Prediction, Malware Detection. **Courses:** AI for Everyone (Mahara-Tech), AI for Beginners (HP Foundation), ML for Beginners (SoloLearn), Machine Learning & Data Science (Edraak).
